Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wildfeuer (6298055) in view of Sato et al (6078882).

As per claims 1,7,14,19,20, Wildfeuer (6298055) teaches:

“transmitting audio over a network.....audio packets are stored in a jitter buffer.....jitter buffer latency.....modified during periods of quasi-silence....types of audio, non-speech audio or speech audio comprising” as voice encoding/decoding over a data network minimizing latency times by detecting speech or non-speech (col. 2 lines 7-22 and lines 43-58)

“a non-speech detection module....audio” as detecting a real or false dtmf (col. 6 lines 15-32)

“an add header.....data packet” as data packets (Fig. 4) with headers (col. 3 lines 57-67)

Art Unit: 2655

“a remove header routine.....enabled” as removing fixed delay’s and changing the delay based on a voice/speech determination or a dtmf determination (col. 4 lines 40-55)

Wildfeuer (6298055) does not explicitly teach the non-speech identifier being stored in the header of the data packet, however, Sato et al (6078882) teaches a non-speech identifier being stored in the header (abstract, Fig. 2, Fig. 3). Therefore, it would have been obvious to one of ordinary skill in the art of data structures to modify the teachings of Wildfeuer (6298055) with non-speech identifier storage in a header because it would reduce the unnaturalness of the reconstructed speech caused by speech spurts and pauses (col. 1 lines 48-62).

As per claims 2,8,15, Wildfeuer (6298055) teaches one bit notification (figs. 5 and 6)

As per claims 3,9,16, Wildfeuer (6298055) teaches RTP (col. 8 lines 19-25)

As per claims 4&5,10,11,17,18, Wildfeuer (6298055) teaches identifying states based on speech or dtmf detection (col. 6 line 50 – col. 7 line 29)

As per claims 6,12,13, Wildfeuer (6298055) teaches buffer latency disablement (col. 2 lines 44-50)

Response to Arguments

3. Applicant's arguments with respect to claims 1-20 have been considered but are not persuasive. As per applicant's arguments that the prior art does not teach a non-speech identifier, examiner argues that Sato's identification process of noticing a Pause or Hangover is a non-speech identifier (fig. 3 of Sato).

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. **Any response to this action should be mailed to:**
